Technology Simplified

What is MSP Cloud Verify?

Integrity. Commitment. Respect. Excellence.
These four words are the foundation of our work. Our Core Values guide each decision we make as employee owners, and they demonstrate our pledge to go the extra mile for our clients.

With these values in mind, we recently became the first IT company in Montana to earn a MSP Cloud Verify Certification—a rigorous industry qualification for cloud and managed services. We're extremely proud to say we're one of few who have elected to meet this challenge.

Why take on this responsibility? As you know, the cloud is big and unwieldy. It's not regulated, and there are no watchdogs. That's why we decided to raise the bar and demonstrate our commitment to excellence when it comes to providing cloud and managed services. With the MSP Cloud Verify certification, we are actively providing safer solutions in cyberspace.

Our Clients Say

"As our business expanded, we had fallen into the trap of a 'piece-by-piece' approach to expanding our network and computer systems. In 2017, we called Luke at Systems and asked him to come in to evaluate our network—which consists of 20+ computer work stations, along with numerous other pieces of technology—and provide us with recommendations on how to improve. Within a week, Luke and Greg had come up with a comprehensive plan to upgrade, repair, and stabilize our computer network, and projected our plan of action over a five-year period—at no charge.

"Since integrating the plan, our office has seen an enormous boost in efficiency. All of our computer systems update automatically, there is live-time monitoring. Generally when we have a problem, Greg is in our office within the hour.

"Many people—myself included—are skeptical of technology firms because the service is often slow and the product is underwhelming. Systems breaks the mold. I would recommend Morrison-Maierle's Systems to anybody who is looking to streamline and improve their technology systems. They have become an absolute necessity to our business."

— *Rodger Hulbert, Administrator, South Hills Dental*

About Us

With offices in Helena, Missoula, Billings, and Bozeman, Systems Technology Consultants is a subsidiary of Morrison-Maierle, a Montana-based engineering firm that's been in business since 1945.
