Technology Simplified

What is MSP Cloud Verify?

Integrity. Commitment. Respect. Excellence.

These four words are the foundation of our work. Our Core Values guide each decision we make as employee owners, and they demonstrate our pledge to go the extra mile for our clients.

With these values in mind, we recently became the first IT company in Montana to earn a MSP Cloud Verify Certification—a rigorous industry qualification for cloud and managed services. We’re extremely proud to say we’re one of few who have elected to meet this challenge.

Why take on this responsibility? As you know, the cloud is big and unwieldy. It’s not regulated, and there are no watchdogs. That’s why we decided to raise the bar and demonstrate our commitment to excellence when it comes to providing cloud and managed services. With the MSP Cloud Verify certification, we are actively providing safer solutions in cyberspace.

Our Clients Say

“Systems is staffed with friendly, supportive employees. Our office has never hesitated to contact them with an issue and we are never made to feel ignorant no matter the problem. The technicians are great at response times and once the issue is resolved they make sure to follow-up on the correction. The technicians are also behind the scenes, continually monitoring and updating our programs and server. Thanks Systems!”

**— Kandy Gustafson, Administrative Assistant
for Marty Connell Agricultural and Financial Management, Inc.**

“Systems Technology Consultants is hands down the most professional, honest, direct, competent, friendly IT firm we have ever worked with. John Thomas and his team have made our entire company feel more at ease that our system is being taken care of by competent professionals.”

—Shan Tompkins, Tompkins & Peters CPAs, P.C

About Us

With offices in Helena, Missoula, Billings, and Bozeman, Systems Technology Consultants is a subsidiary of Morrison-Maierle, a Montana-based engineering firm that’s been in business since 1945.
