Technology Simplified

What is MSP Cloud Verify?

Integrity. Commitment. Respect. Excellence.

These four words are the foundation of our work. Our Core Values guide each decision we make as employee owners, and they demonstrate our pledge to go the extra mile for our clients.

With these values in mind, we recently became the first IT company in Montana to earn a MSP Cloud Verify Certification—a rigorous industry qualification for cloud and managed services. We're extremely proud to say we're one of few who have elected to meet this challenge.

Why take on this responsibility? As you know, the cloud is big and unwieldy. It's not regulated, and there are no watchdogs. That's why we decided to raise the bar and demonstrate our commitment to excellence when it comes to providing cloud and managed services. With the MSP Cloud Verify certification, we are actively providing safer solutions in cyberspace.

Our Clients Say

"Our Missoula-based law firm has utilized Morrison-Maierle's Systems for our IT support and computer technical services for the past six years. In our experience, the expertise and professionalism of the Systems staff are unsurpassed, and we have been extremely satisfied with the services Systems has provided us.

In addition to working with us through growth and change, Systems has adeptly addressed any system difficulties and maintenance issues we have encountered and worked tirelessly to provide us with network support and system security. Systems' industry-leading team of professionals has demonstrated a commitment to high standards and innovative solutions.

We unequivocally recommend consulting with Systems regarding your computer network support and IT needs."

— Bjornson Jones Mungas, PLLC

"We don't feel like our company needs to worry about IT challenges."

—Tom Singer, Axilon Law Group, PLLC

About Us

With offices in Helena, Missoula, Billings, and Bozeman, Systems Technology Consultants is a subsidiary of Morrison-Maierle, a Montana-based engineering firm that's been in business since 1945.
